PROGRAM OVERVIEW AND OBJECTIVES

11:30-12:30 Registration/Lunch with first presentation starting promptly at 12:30.

Pulmonary Management of the Neuromuscular Patient

Deanna Diebold, MD

1.0 CEU

Learn how neuromuscular weakness impacts the respiratory system when the patient is both awake and asleep. Understand the importance of maintaining a clear airway and selecting appropriate therapy for airway clearance. Review guidelines for the respiratory care of neuromuscular patients.

Clearing The Air on Secretion Management

Gary DuLong, Phillips Respironics

1.0 CEU approved by AARC, ASNA

Explore the differences between mobilizing and clearing bronchial secretions and learn to provide practical therapy guidance in patients who suffer from chronic conditions affecting the respiratory system.

Sleep Disordered Breathing and Co-Morbidities

Annette Mohs, Phillips Respironics

1.0 CEU approved by AARC, AAST, CCMC, ASNA

Identify the various forms of sleep-disordered breathing. Review current trends in co-morbid conditions and the benefits of treatment.

Contemporary Oxygen Technology

Bob Messenger, Invacare

2.0 Activity Clock Hours for CCMC

1.0 CRCE for Respiratory Therapists

The program is intended for home respiratory care practitioners, case managers, discharge planners and others interested in long-term care and management of the respiratory patient.

The purpose of this program is to enhance the knowledge of diseases, therapeutic systems and other factors that affect the care of respiratory patients in the home. Discussion will review the current state of COPD in the US, including disease scope, costs, hospitalization frequency and social impact. Discussion highlights the effect of long-term oxygen on outcomes such as quality-of-life and the prevention of premature death. The role of ambulatory oxygen systems and their importance in supporting improved outcomes is presented.

Ambulatory oxygen technologies are reviewed and a method for matching patient lifestyle and technology is discussed. Presentation is offered without bias to any specific manufacturers products.

*Class Size is Limited.
